

Anthony Astige

AnthonyAstige@gmail.com | (510) 982-6603 | Skype: [AnthonyAstige](#)

Full stack web developer 10+ years from [PHP](#) to [NodeJS](#) (+[Meteor](#))

CEO Experience of my small web development firm for over 4 years

1099 hourly contracting through my own company, Zinid LLC

Recent web development examples

I was the sole engineer and designer for these including any database, server side management / code, CSS, JavaScript, etc.

2017 JavaScript adventures

- [beats.zinid.com](#) - Demo game made in 10 days using YouTube's API & learning React. Also has a level editor.
- [inlined-woffs.zinid.com](#) - Open source webtool to find and massage fonts to be inline for extremely fast loading websites.

2015-2016 Meteor projects

- [www.trackmyfoods.com](#) - Personal food tracking (calories, protein, ...) with personal recipes, meta nutrients, and more.
- [workout-timer.fowk.com](#) - Creates timers for different workouts allowing you to quickly change sets & timing.
- [vms.codeforeauclaire.org](#) - Spins up temporary virtual machines on Digital Ocean for ad hoc volunteer teams.
- [beta.wingr.net](#) - Proof of concept like Tinder but your friends find you dates. Creative Facebook API use and UX design.
- [shuttles.fowk.com](#) - Google map app that gathers and shows hotels near airports with free shuttles. Try SFO to see data.

Technology

Primary stack

- [Meteor.js](#) (JavaScript, HTML, CSS, MongoDB, Node.js)
- [MetalSmith](#) (Node.js - Pipeline composing and plugin writing for static site generation)
- GIT (Command line use, hosted at [github](#), [bitbucket](#), and [beanstalk](#))
- Misc: [React](#), [Bootstrap](#), light linux server administration, Facebook API

Core tools

- [Vim](#) (Converted from [Emacs](#) in 2004)
- [Gmail](#) (Inbox 0)
- [Trello](#) (Project management)

Past, secondary, & minor

- **Web:** ES6, lodash, jQuery, CSS3, PHP(+CakePHP +WordPress), Cordova, ActionScript, Templating (Blaze, Smarty, PHP, ...)
- **Server:** Node.js, NPM/NVM, HAProxy, PM2, LetsEncrypt/CertBot, Apache, Nginx
- **Databases:** MySQL(+ADODB), MongoDB, PostgreSQL, FQL
- **APIs:** Facebook (+FQL +FBML), Google Maps, Digital Ocean, BaseCamp, Authorize.net CIM API, PhantomJS/CasperJS, ...
- **Hosting:** Digital Ocean, CloudFlare, Github pages, Rackspace, AWS, Google Cloud Platform, Namecheap
- **Scripting:** Bash scripting, DOS Batch files, Windows PowerShell, AHK (AutoHotKey)
- **Languages:** C, LISP, Pascal, C++
- **OS's:** Ubuntu (14-16), CentOS(5-7), Unix(solaris), Windows 3.11-8
- **Software:** VirtualBox, Parallels, Microsoft Virtual PC, VNC, Trac, Web shopping carts, Credit card transactions, Basecamp
- **Hardware:** X86 hardware construction & troubleshooting, Networking
- **Concepts:** MVC, RDBMS, NoSQL, Exceptions, Separation of concerns, SSL/public-private key encryption, Web Security (XSS, XSRF, SQL, SQL injection, File permissions, SQL permissions), REST API Implementation, Responsive web design

Business
